

# CORRELATION

Use to visualize the relationship between two or more metrics.

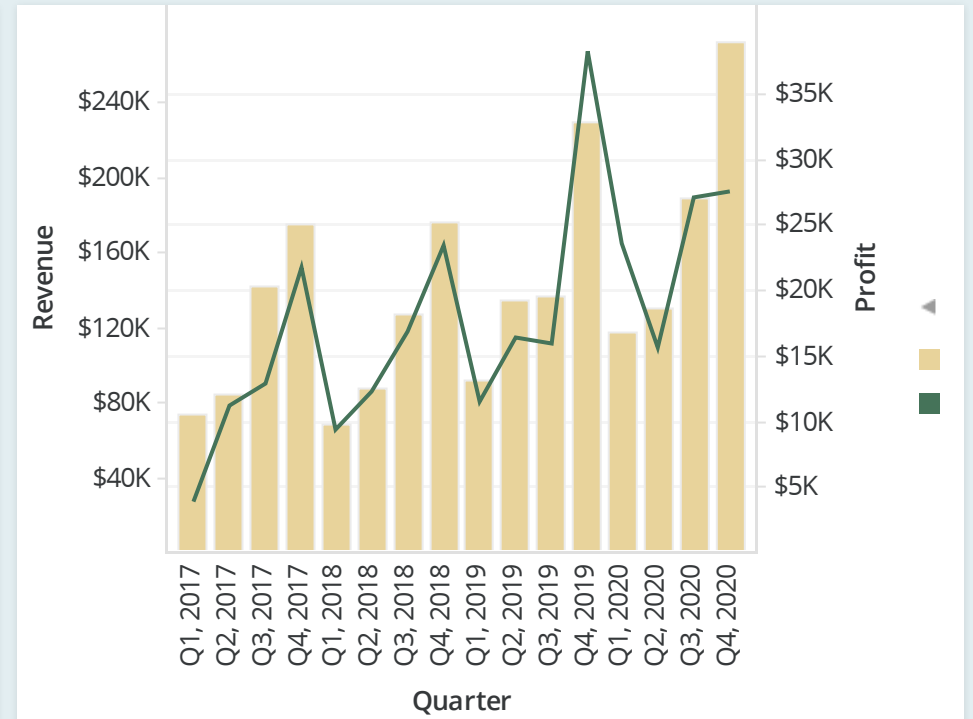

## Scatter Plot

Uses position to show the relationship between two metrics. Add a trend line to model an existing correlation.

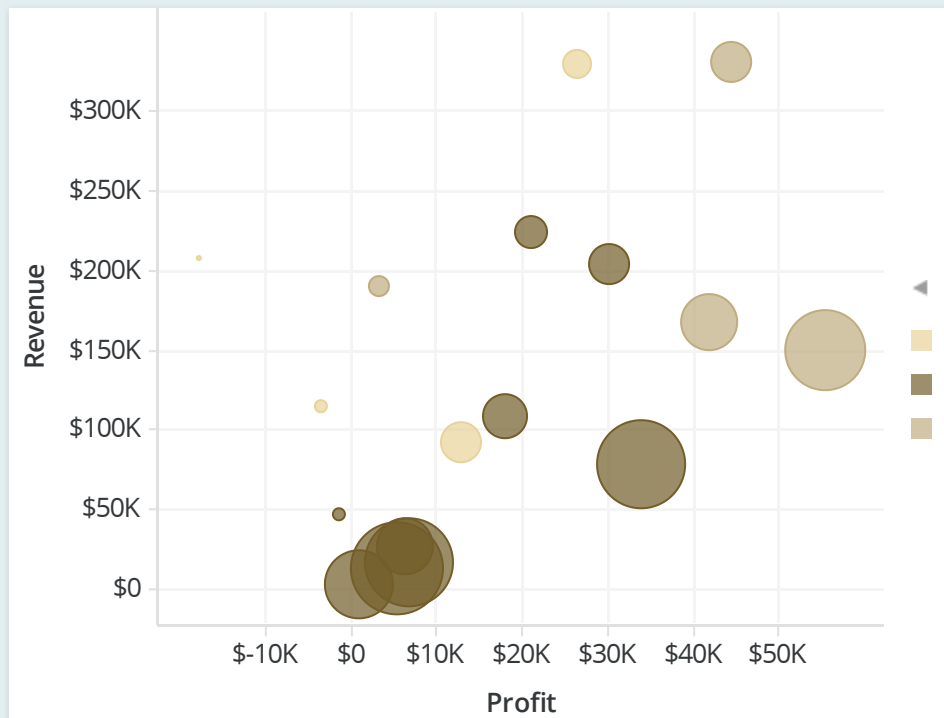

## Combo Chart

Combines a line and bar chart for comparison of metrics with different units.

## Bubble Chart

Uses position, color and size to show relationships and correlations.

## Matrix Bar Chart

Depicts values across two axis variables as a grid of squares in different sizes or colors.
