

DISTRIBUTION

Use to show data values and how frequently they occur across categories.

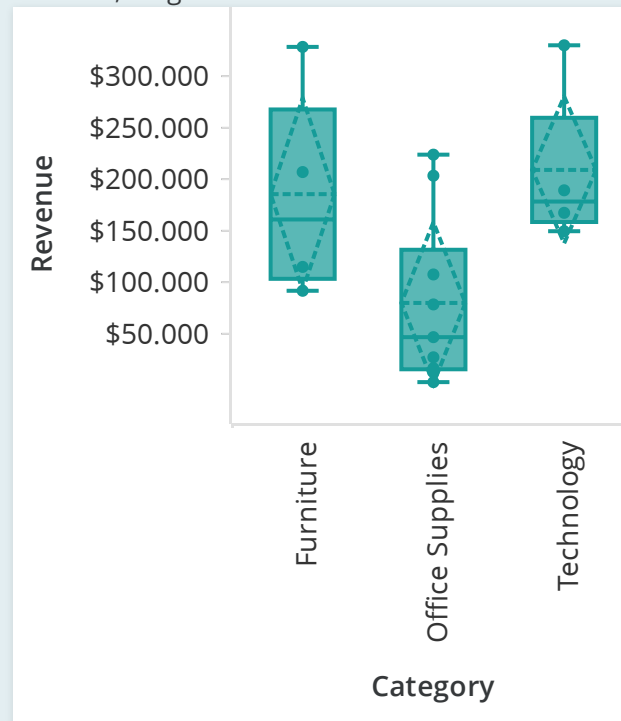

Histogram

Uses length to show the frequency of values within given categories/metric ranges.

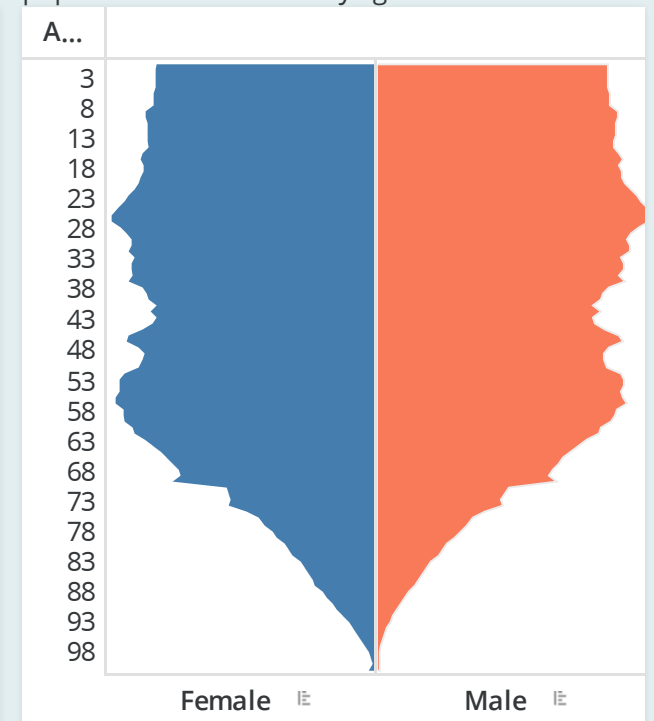

Box Plot

Uses several data points to visualize means, medians, ranges and outliers.

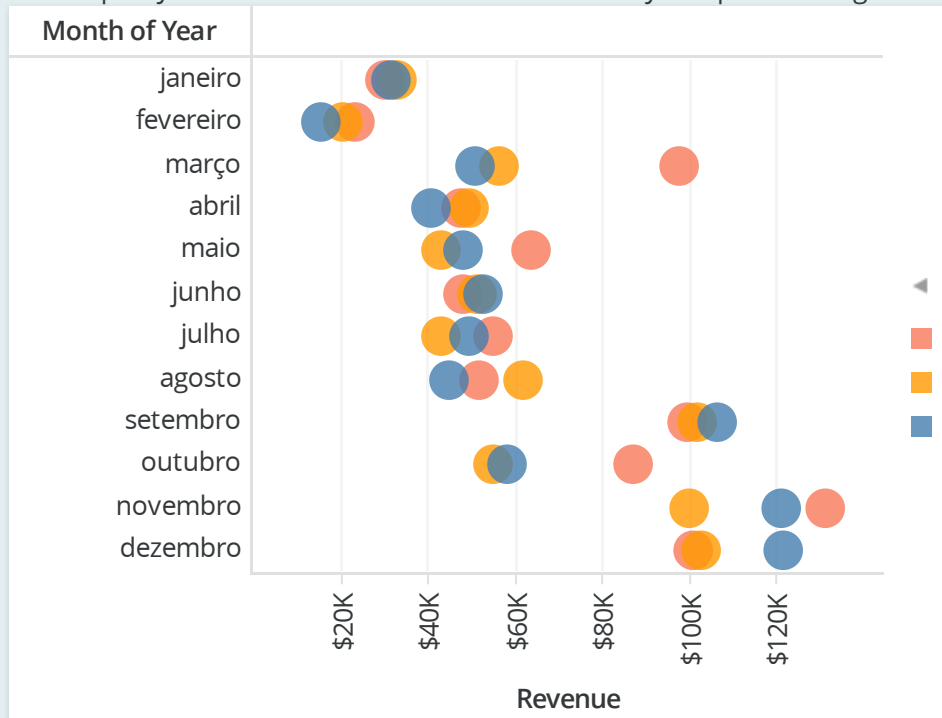

Population Pyramid

Area chart that is commonly used to show how population is distributed by age and sex.

Dot Strip Plot

Bubble chart that displays how a metric value is distributed across categories. The simplicity of this visualization allows users to easily compare rankings.

Barcode Chart

Horizontal clustered bar chart that shows the distribution of a metric across categories using tick marks that represent unique values within each category.
