

# PART-TO-WHOLE

Use to display the relationship between the total value of a metric and its components.

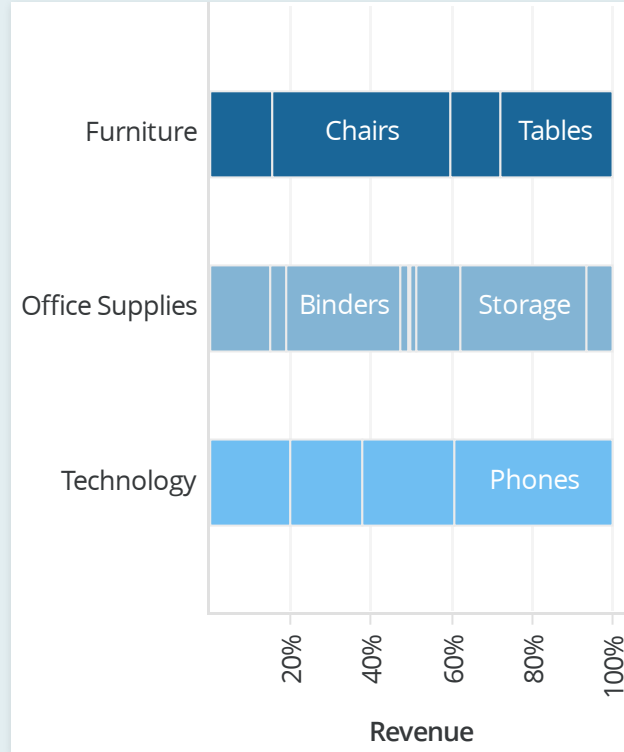

## Vertical Percent Bar Chart

Exhibits an analysis of statistical data in terms of percentages.

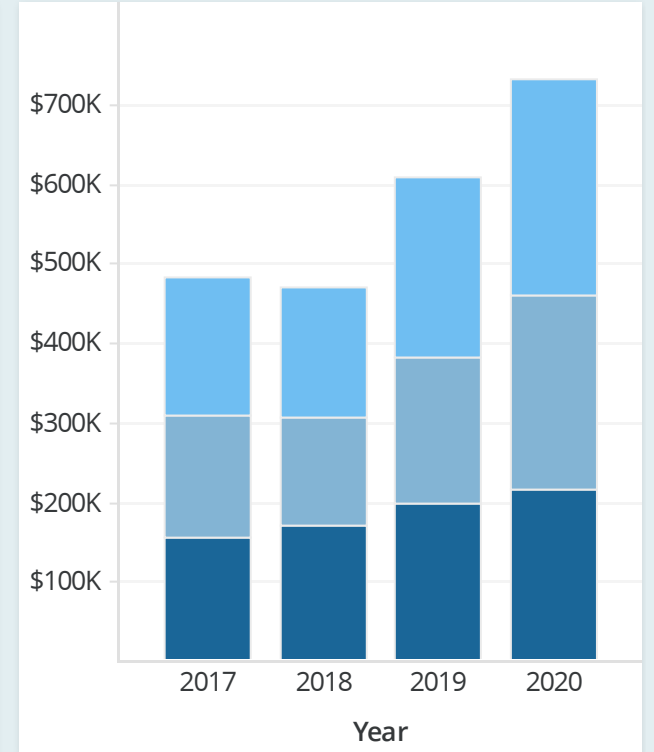

## Horizontal Percent Bar Chart

Exhibits an analysis of statistical data in terms of percentages.

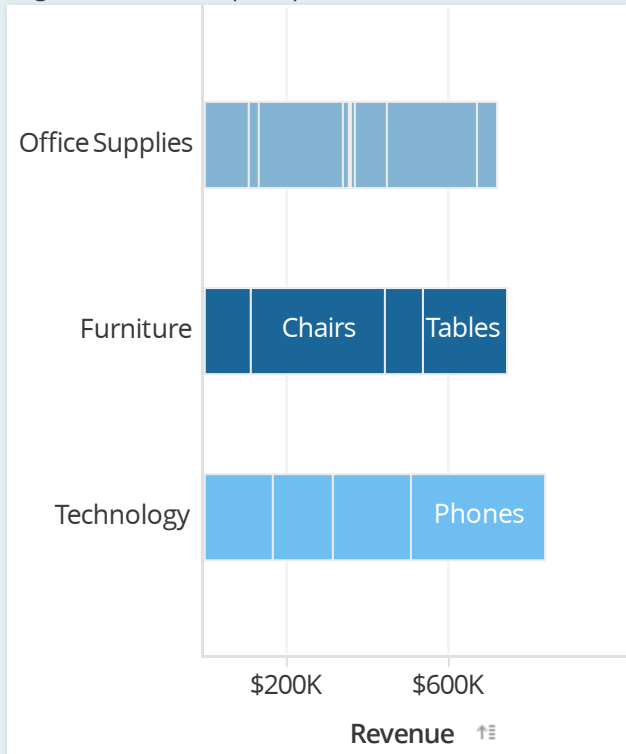

## Vertical Stacked Bar Chart

Compares data categorically using bars, with bars segmented to compare parts of a whole.

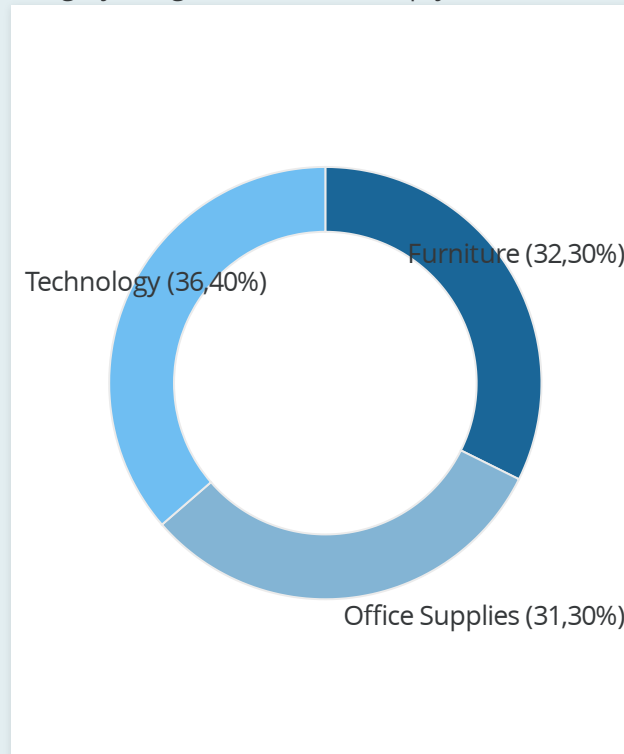

## Horizontal Stacked Bar Chart

Compares data categorically using bars, with bars segmented to compare parts of a whole.

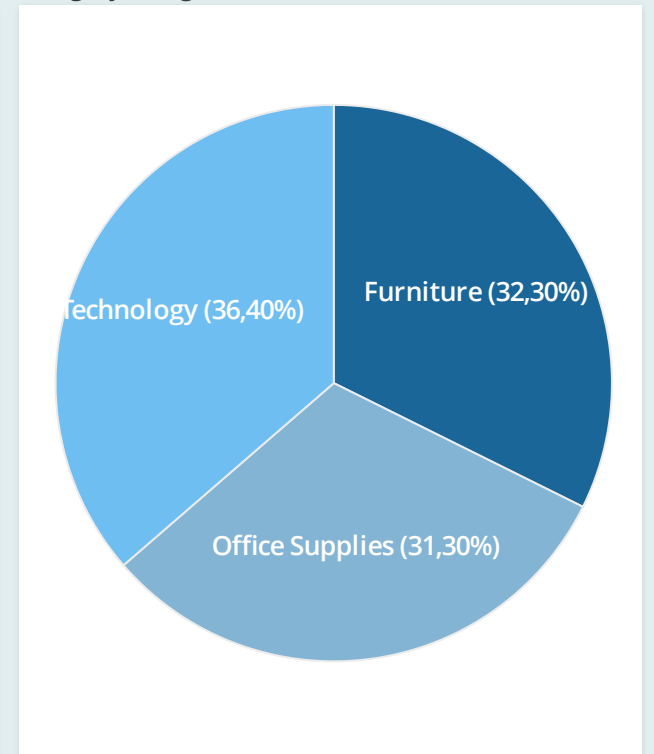

## Ring Chart

Shows the composition of a total value divided by category using a circle with an empty center.

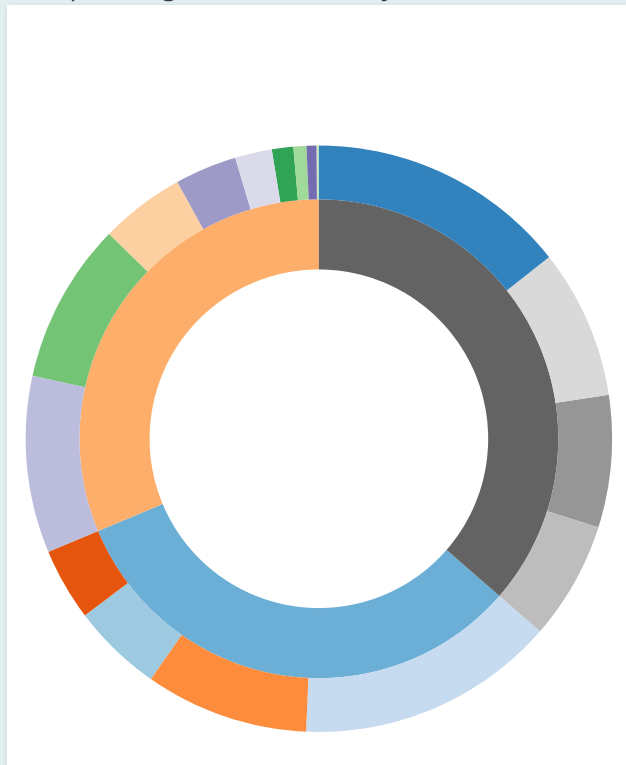

## Pie Chart

Shows the composition of a total value divided by category using a circle.

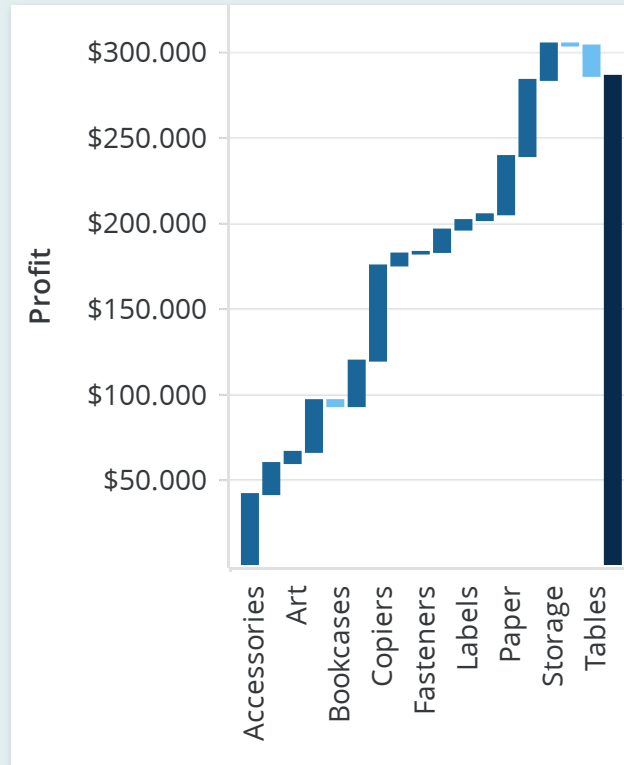

## Sequences Sunburst

Shows the composition of a total value divided by multiple categories hierarchically.

## Waterfall

Uses bars and colors to show how categories increase or decrease a metric value.

## Heat Map

Uses rectangles of varying sizes and colors to show hierarchical data.
